THROUGH THE LENS OF A PM

Presented by

THE PRODUCT FOLKS

PROBLEM STATEMENT

PROBLEM STATEMENT

CollEdge is a two-sided discovery platform that connects undergraduate and graduate students searching for the ideal college as well as looking for financial aid. The app's stakeholders are:

- **Students (B2C)**, who can access one of two portals to discover and apply to colleges and student loan offerings respectively.
- **College admins (B2B)**, who can list their schools and process incoming student applications.
- **Financial lender organizations (B2B)**, who can list loan offerings and process incoming student loan applications.

Your challenge: Create a personalized onboarding experience for each of the three stakeholders with a focus on the signup, login, and registration process.

DELIVERABLES

Research Slide:

- Overview of current onboarding practices for each CollEdge stakeholder (students, college admins, financial lenders).
- Analysis of personalization trends in onboarding across similar platforms.
- Key challenges and gaps in existing onboarding processes for each groups.

Onboarding Definition Slides:

- Students: Define a personalized onboarding experience focusing on sign-up, login, and registration.
- College Admins: Define a tailored onboarding process for listing schools and managing student applications.
- Financial Lenders: Define a customized onboarding experience for listing loan offerings and processing applications.

Onboarding Strategy:

- Develop a clear strategy for each stakeholder, outlining how the personalized onboarding experience will meet their needs and improve their interaction with CollEdge.

ASSESSMENT CRITERIA

Your submission will be evaluated based on the following product management criteria:

- **Problem Identification:** The clarity and relevance of the problem or opportunity identified in the EdTech industry.
- **Product Vision:** The strength and uniqueness of your product's vision and value proposition.
- **Market Analysis:** The depth of your market analysis and its alignment with recent technical development in EdTech.
- **Product Strategy:** The effectiveness of your product strategy in addressing the identified problem and achieving goals.

In this product management case study, you have the opportunity to leverage CollEdge signing platform to create an innovative solution that addresses a critical challenge in the EdTech industry. By demonstrating your ability to identify market needs, develop a compelling product vision. We are NOT assessing the effectiveness of your plan for launching, designs or any post-launch activities.

SUBMISSION GUIDELINES

Here are some guidelines to assist you in submitting your final solutions:

- **Submission Deadline: 17th August EOD**
- **Presentation Length:** Craft a concise presentation consisting of a maximum of 10 slides. Please note that this count excludes the cover and thank-you slides.
- **File Format:** Save your submission in PDF format and name the file “teamname.pdf”.
- **Dispute Resolution:** In the event of any disputes or concerns, kindly note that E-Cell, IIT Guwahati's decision will be regarded as final.
- **Submission Portal:** You can conveniently upload your solution using the following link:
