### Onboarding Case Study

**Team - WINNERS**
Prasoon Pandey
Arunaditya Dash
Madhav Rathore

The red areas denote “red ocean” areas. The areas characterized by intense competition & saturation

Static College Comparison Tools

AI-Based Application Progress Tracker

Automated Background Verification

Email-Based Support with AI Auto-Responses

Basic College Listings with AI Enhancements

student application tracking and AI support

Usually platforms do not let student apply on the platform itself, rather divert to official college websites

# Current Funnel

**LANDING**
Discover: via search, social media, or referral.
clean design and clear value proposition.

**EXPLORE**
Browse colleges with filters and recommendations
financial aid options through the Financial Aid section.

**APPLY**
Access a unified application portal for multiple colleges
Utilize "Magic Filling" for pre-filled forms.

**POST-APPLICATION**
Get notifications on college acceptance and loan approval.
Follow through with next steps .

There is no such site that has all three stakeholders on a single platform

Virtual Reality (VR) & Augmented Reality (AR) College Tours

IVY.AI for Onboarding buddy & tutor

AI-Driven Financial Aid Optimization

AI Chatbots Financial Aid Guidance & Application Assistance

AI-Driven Peer and Alumni Matching

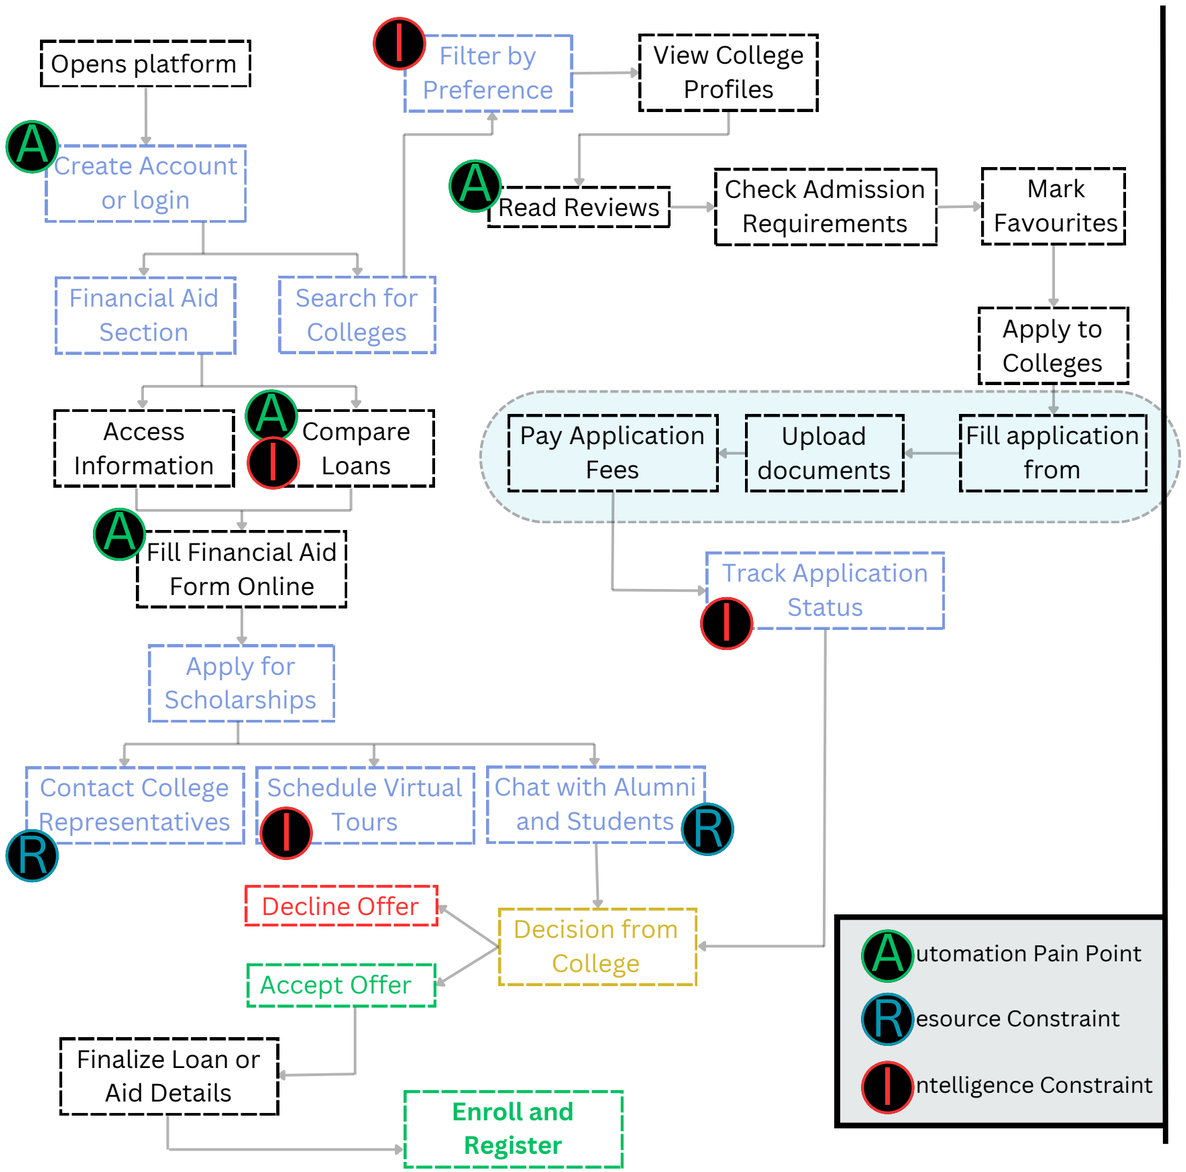

AI-Powered Personalized College Matchmaking

The blue areas denote “ blue ocean” opportunities. This is characterized as untapped market space

| Threat | Student Onboarding | College Listing | Financial Lending |
|---|---|---|---|
| High | CollegeDekho, shiksha | GETMYUNI, CollegeDekho | eduvanz, CREDENC |
| Medium | CAREERS 360, ADMISSION INDIA, | shiksha, admission 24, collegedunia | InCred, HDFC CREDILA, AUXILO |
| Low | collegedunia, common app, NICHE | CAREERS 360, StudyGuideIndia, studyportals | GyanDhan, NOMAD CREDIT |

# Problems Summary

| Problems | Student | Admin | Lender |
|---|---|---|---|
| Time-intensive signups and applications | ✓ | ✓ | |
| Analyzing trends of applicants | | ✓ | ✓ |
| Risk assessment based on applicant profile | | | ✓ |
| Inefficient processing of applications | | ✓ | |
| Difficulty finding best-fit colleges | ✓ | | |
| Applying for each college separately is time-consuming | ✓ | | |
| Tracking and managing multiple applications | ✓ | ✓ | |
| Tracking academic milestones for loan disbursement | | | ✓ |
| Communication barriers with diverse applicants | | ✓ | |
| Interview scheduling and follow-ups | ✓ | ✓ | |
| Limited scholarship matching tools | ✓ | | |
| Real-time verification of admission status and fees | | | ✓ |
| Inflexible admission workflows | | ✓ | |
| Inadequate college comparison tools (fees, ROI, etc.) | ✓ | | |
| Customizable admission workflows | | ✓ | |
| Lack of personalized career counseling | ✓ | | |
| Missing deadlines and important notifications | ✓ | | |
| Promoting college-specific USPs to students | | ✓ | |

# User Personas

## Student (B2C)

- Priya Sharma, 17, 12th Std
- Middle-class family, Jaipur
- CBSE, Science stream
- 1st gen college aspirant
- Comfortable with tech

### Goals

- **Admission** in a top-tier engineering college
- Find **scholarships** or **education loans**
- Understand admission **process intricacies**
- Explore **career opportunities** in emerging tech fields like AI, ML and Data Science

### Pain Points

- Lack of **personalized guidance** on which colleges match her academic profile
- Confusion on **varying admission criteria**
- Difficulty in **tracking application deadlines**
- Limited awareness of **scholarship opportunities**
- Uncertainity about **ROI of college programs**

### Our Solutions

- **Personalized dashboard** showcasing best-fit colleges based on academic performance
- **Unified application system** for multiple colleges
- **Scholarship discovery tool** with profile match
- **College comparison** based on key metrics & ROI
- **Notifications on application timelines**

## College Admin (B2B)

- Dr. Rajesh Gupta, 52
- Dean of Admissions
- Private Engineering College
- New to Digital Admissions
- Team of 10 Admission officers

### Goals

- Increase the **quality and quantity of applicants**
- **Streamline processes** to reduce manual work
- Improve the college's **visibility and reputation**
- Ensure **compliance** with regulatory bodies
- Optimize **resource allocation** during the admission cycle

### Pain Points

- **Errors and backlogs** in manual processing
- Lack of **data-driven insights** to make informed admission and marketing strategies
- Struggle to compete with more established institutions in **attracting top talent**
- **Communication with applicants** in different languages

### Our Solutions

- Application processing with **built-in verification**
- Analytics dashboard with **real-time insights**
- **Customizable admission workflows** and **multilingual interface** to match college needs
- Integrated **communication tools** (E-mail, SMS)
- **Digital marketing tools** to display college USPs

## Lender (B2B)

- Anita Desai, 39
- Manager, Loan Divison
- Public Sector Bank, Mumbai
- Oversees loan disbursement
- 15 Yrs of exp. in banking

### Goals

- **Increase education loan disbursement** while maintaining a healthy loan book
- **Minimize the risk of (NPAs)** in the segment
- **Simplify loan application** and approval
- **Expand the bank's education loan portfolio** in Tier 2 and Tier 3 cities

### Pain Points

- **Incomplete or inaccurat**e loan applications
- Assessing the **creditworthiness of students**
- **Verifying college details and fee** structures
- **Competitive education loan market**
- **Time consuming process** of verification
- **Tracking student performance** post loan

### Our Solutions

- **AI-powered screening** of loan applications
- **Built-in credit scoring model** for students
- **Integration with partner colleges** for real-time verification of status and fees
- **Digital document upload and verification**
- **Customizable loan product builder**

**Several ERPs and Legacy Softwares exist on the B2B end (lender & admin)**

**Effective Onboaring requires seamless migration onto our Cloud-based platform**

**"Low effort migration" and "Extreme automation/intelligence"**

**Legacy SIS1 API gateway**
- Integration
- Documentations
- Fees tracking
- Application Tracking
- Applicant Profiling
- Reports

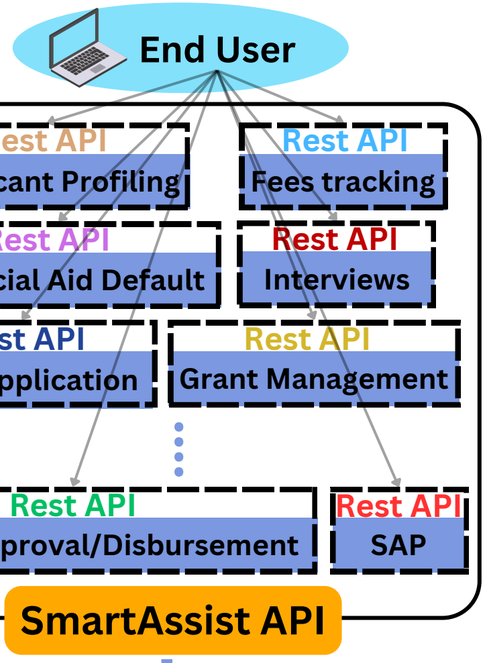

**Legacy SIS2 API gateway**
- Forms/Checklists
- Waitlists
- Recommendations
- Interviews

**Legacy SMAFS1 API gateway**
- Loan Application
- Financial Aid Default
- Loan Repayment
- Regulatory Compliance
- Portfolio Management
- Financial Need Analysis
- Loan Approval/Disbursement

**Legacy SMAFS2 API gateway**
- Return of Title IV Funds
- Student Employment
- Grant Management
- SAP

**No-effort / Comfortable Migration**

**from Legacy ERPs to Cloud-based, multifunctional platfom**

*SmartAssist is built on a scalable microservice architecture which allows easy data migration

Testing done → Issues resolved; patches released → Validate Migration → SmartAssist Go-live

*Testing and Go-Live

## Automation and AI integration for minimum effort onboarding and navigating

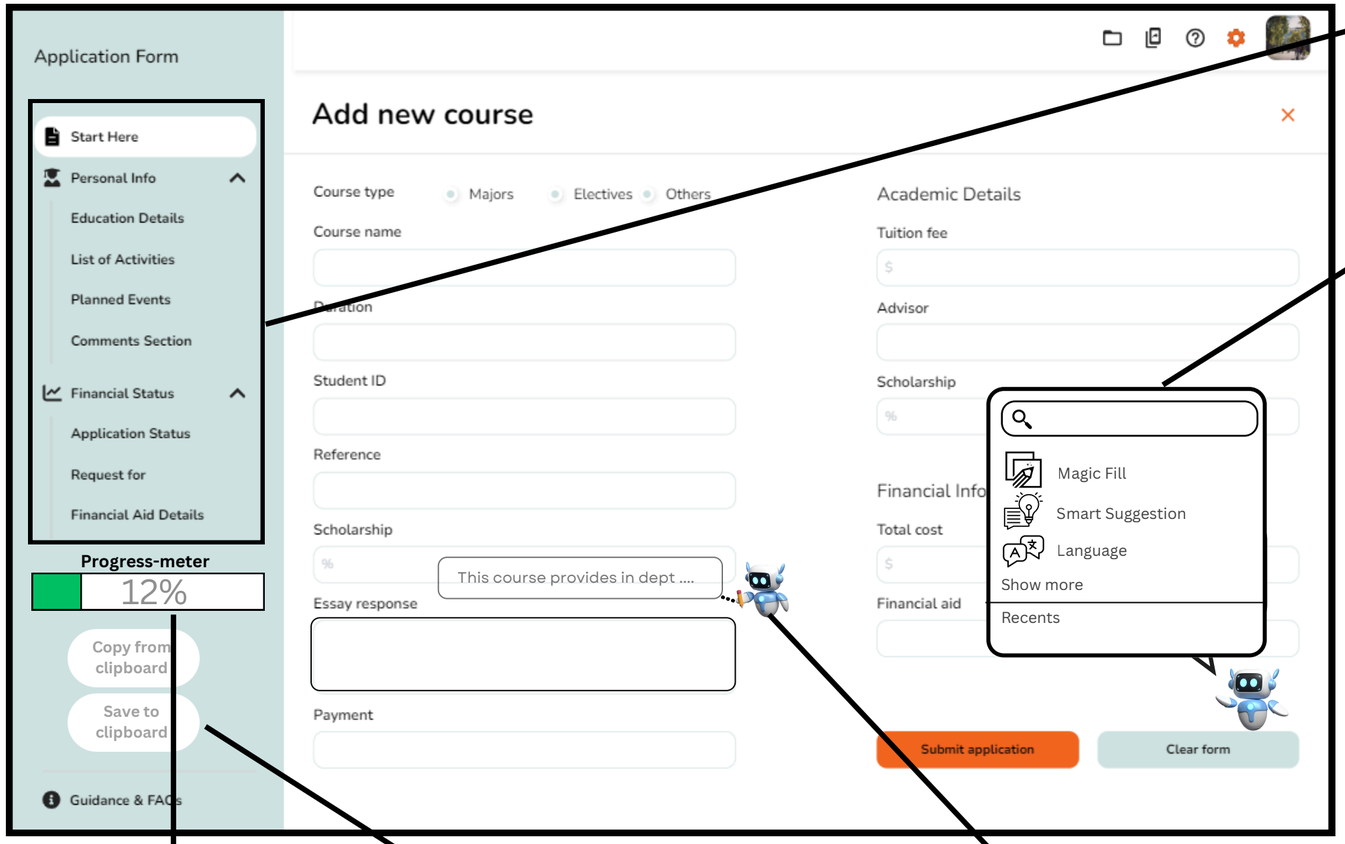

- **Web Scraping**
- **"Merlin AI" type helper AI bot**

For minimum effort / discomfort / confusion while singning up, navigating, and all other intensive tasks

- **Build-in Data Analytics Support on B2B end**

To offer more comprehensive Student Analytics reports compared to Enterprise softwares, due to a more holistic feedback loop.

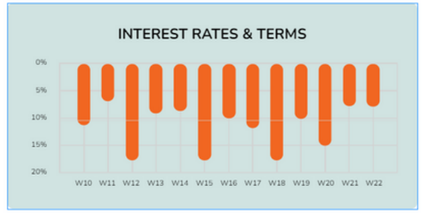

# College Aspirant

Progress visibility at each step makes the application manageable. Users can save progress and resume from where they left off, avoiding restarts. Simplified navigation and clear steps make the process less intimidating.

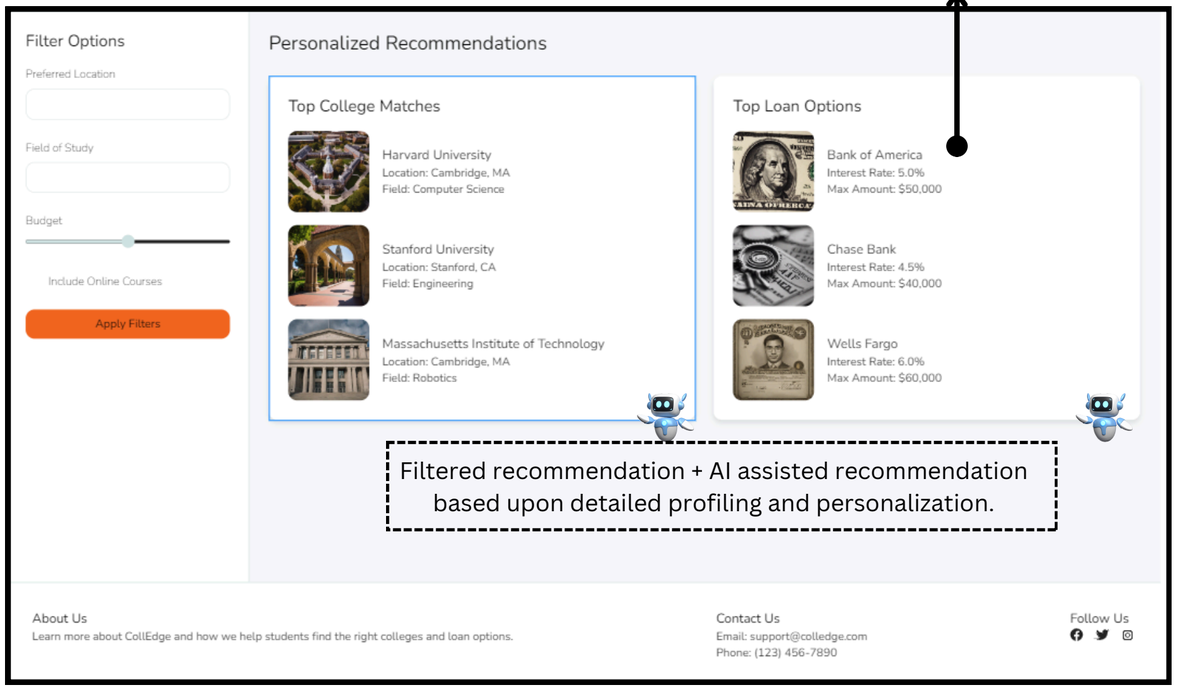

A generative ChatBot, analogous to LinkedIn's MerlinAI, to make everything from signing up and navigating, to smart suggestion etc. easy and low effort

Details of Loan Option (AI+WebScraping) for better decision-making for students

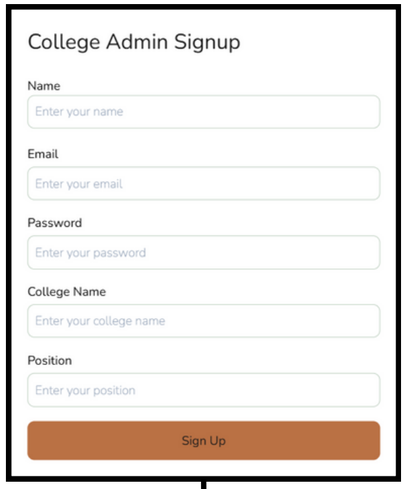

Filtered recommendation + AI assisted recommendation based upon detailed profiling and personalization.

Form-progress tracker to know exactly how much more effort is to be made to complete the process

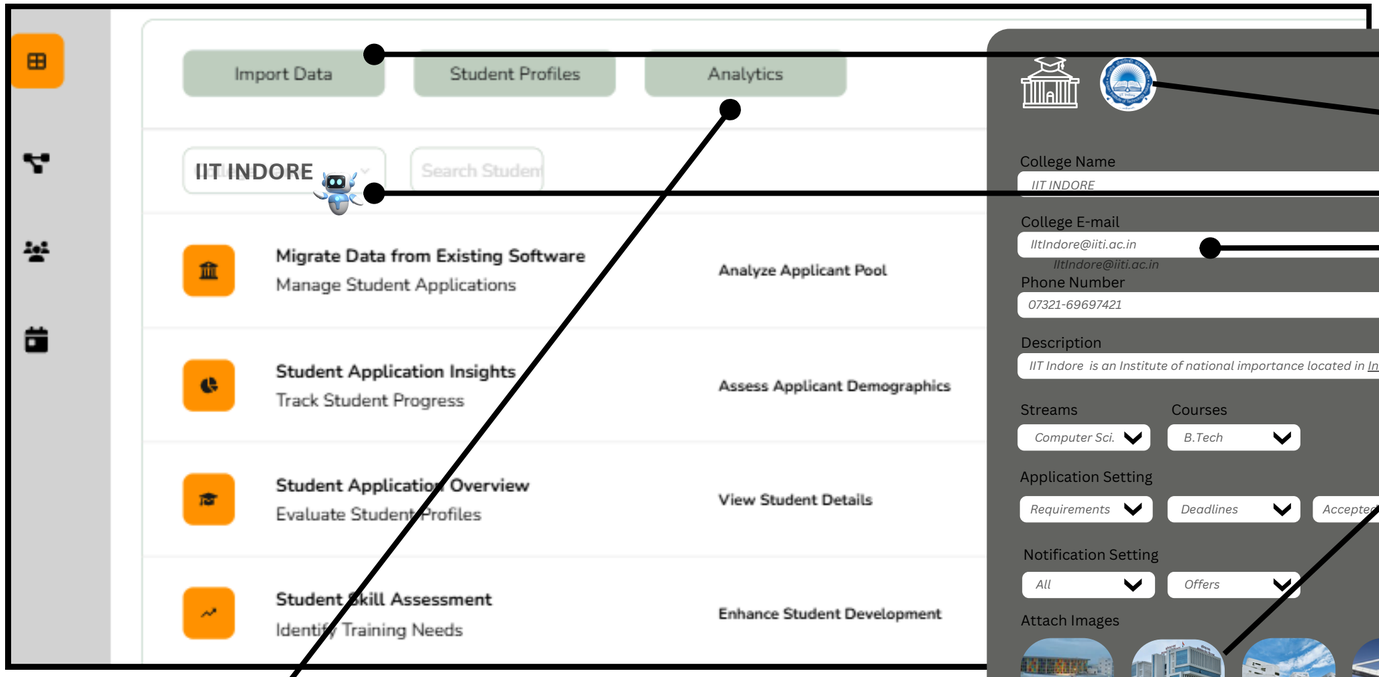

Copy to clipboard feature to **copy current progress** and can be used to fill forms for other colleges. Users can paste their progress into a **new form**, automatically filling out identical fields .

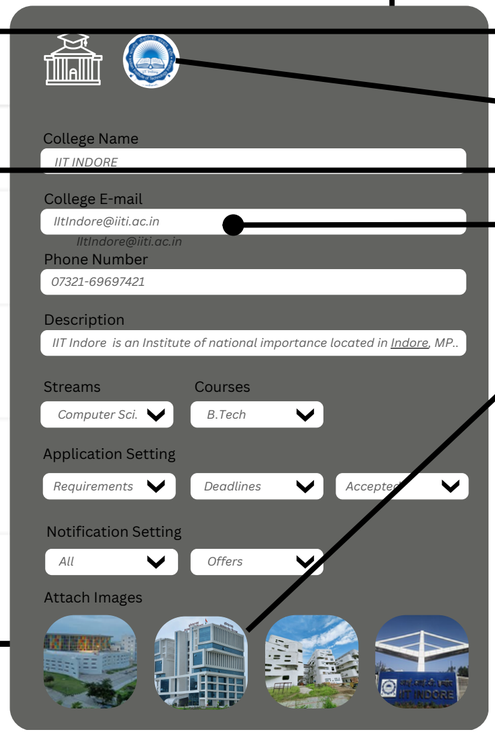

AI Chat-bot for predicting the section to be filled. This ease the applicants experience and saves time. The response are according to the row and adapted by past responses. The response through the bot can be altered according to applicants preference.

# College Admin + Loan Lender

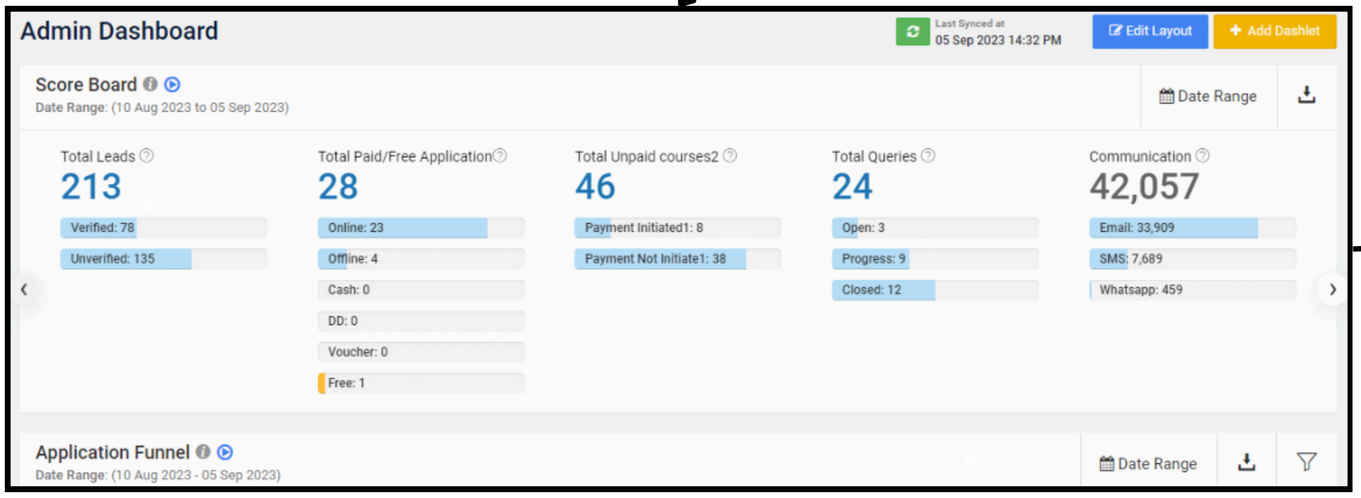

Basic Signup to decide what user (B2B or B2C)

One-Click Import from existing software to CollEdge's Cloud based platform

Just typing in institute name, CollEdge will perform webscraping to gather information to autofill, from detailed description, contact to images and logos.

A detailed analytics dashboard for college admin which include (not limited to)

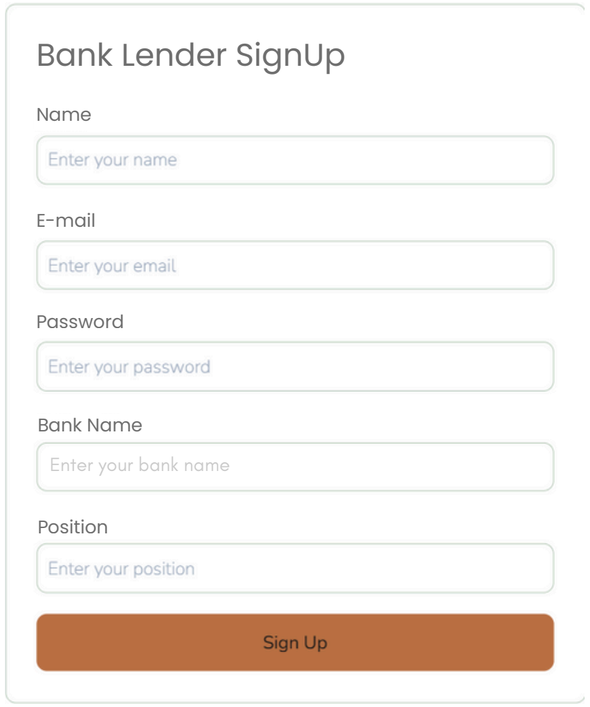

1. Overall student demography details
2. Fees payment status
3. Conversion rates, views and lead generation data
4. Financial status
5. Applicant assessment to determine best students
6. Applciation analyzer (in cases where essay submissions are there)

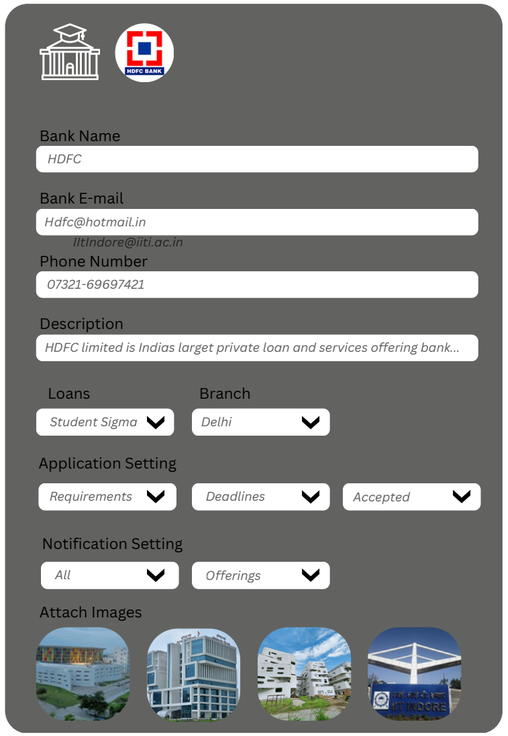

....

## Additional Mandatory Protocols

- Feedback system
- Security Protocols & Tokenisation
- Compliance with Financial Regulations

# Loan Lender

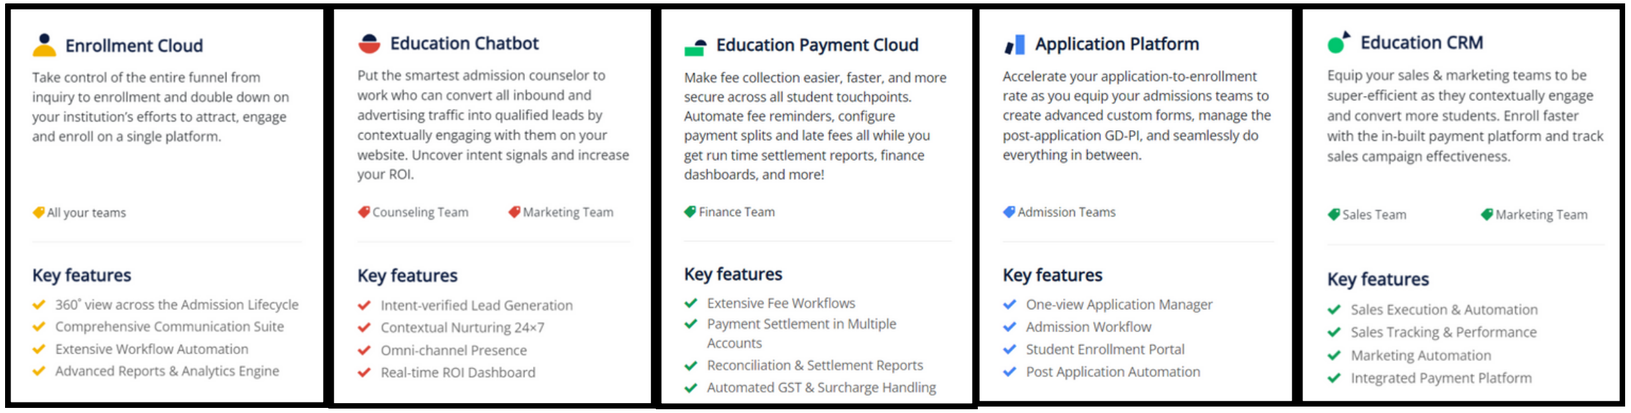

## Additional Features ERPs sometimes lack

- Implement Fraud Detection Measures
- Monitor Loan Portfolio Performance
- Offer Live Chats and Support Tickets
- Tracks Conversion Rates
- Feedback system
- Security Protocols & Tokenisation
- Compliance with Financial Regulations

* 
- AI loan package recommendations based upon student trends.
- Student risk evaluation for decision making

Same autofill and analytics features for lenders

## *Packaged Offerings on the B2B end for onboarding incentive

# Solution Prioritisation - RICE

| Product Feature - Description | User Persona | R | I | C | E | RICE | Remarks |
|---|---|---|---|---|---|---|---|
| Personalized dashboard showcasing best-fit colleges | Student | 9 | 10 | 9 | 3 | 270 | High priority - core to personalized experience |
| Unified application system for multiple colleges | Student | 8 | 9 | 8 | 2 | 288 | High impact, but complex to implement |
| Scholarship discovery tool | Student | 7 | 8 | 8 | 4 | 112 | Important for financial accessibility |
| College comparison feature | Student | 8 | 7 | 9 | 4 | 126 | Useful for decision-making |
| Automated application processing system | College Admin | 8 | 10 | 9 | 2 | 360 | High priority - core to improving efficiency |
| Advanced analytics dashboard | College Admin | 8 | 9 | 8 | 3 | 192 | High value for data-driven decisions |
| Customizable admission workflows | College Admin | 7 | 8 | 7 | 2 | 196 | Important for flexibility, but complex |
| Web scraping for college profile creation | College Admin | 8 | 6 | 7 | 2 | 168 | Time-saving but potential data accuracy issues |
| Integrated communication tools | College Admin | 9 | 7 | 9 | 4 | 141.75 | Enhances efficiency, relatively easy |
| AI-powered initial screening of loan applications | Lender | 8 | 9 | 8 | 2 | 288 | High priority - core to improving efficiency |
| Integrated credit scoring model | Lender | 7 | 10 | 8 | 2 | 240 | Critical for risk assessment |
| Customizable loan product builder | Lender | 6 | 7 | 8 | 4 | 84 | Flexible but not highest priority |
| Digital document upload and verification system | Lender | 9 | 8 | 9 | 3 | 216 | Significant improvement in process |
| Real-time dashboard for monitoring loan portfolio | Lender | 7 | 8 | 9 | 3 | 168 | Important for overall management |

# Success KPIs and Challenges

## Student Metrics

- **Onboarding completion rate** (target: 85%)
- Time to first college application (target: <14 days)
- User retention rate after 60 days (target: 65%)
- **Successful college admissions through platform** (target: 50%)
- Average number of colleges applied (target: 5)

## College Admin Metrics

- Time to complete college profile (target: <4 hours)
- **Application processing time** (target: 50% reduction)
- Increase in out-of-state applications (target: 30% growth)
- **Admin satisfaction score** (target: 4.2/5)
- Data accuracy in uploaded documents (target: 99%)

## Lender Metrics

- **Loan application completion rate** (target: 75%)
- **Time to loan approval** (target: <7 days)
- Reduction in NPA ratio (target: 20% improvement)
- Increase in education loan portfolio (target: 25% YoY growth)
- **Customer satisfaction score for loan process** (target: 4.5/5)

## Overall Metrics

- **Monthly Active Users (MAU)** growth (target: 50% YoY)
- Platform uptime (target: 99.9%)
- Average user session duration (target: 12 minutes)
- **Cross-stakeholder engagement** (e.g., % of students applying to partner colleges)

## Key Challenges

- **Adhering to evolving data protection laws**
- **Overcoming resistance to digital transformation**
- **Preventing fraud and ensuring authenticity**
- **Handling traffic spikes during peak admission seasons**
- **Safeguarding sensitive student information and financial data**
- **Addressing varying levels of digital literacy among users**
- **Ensuring platform accessibility in regions with limited internet connectivity**
- **Ensuring fast response times across diverse geographical locations**
